More than 300,000 engineers have relied on the Engineer-In-Training Reference Manual to prepare for the FE/EIT exam. The Reference Manual provides a broad review of engineering fundamentals, emphasizing subjects typically found in four- and five-year engineering degree programs. Each chapter covers one subject with solved example problems illustrating key points. Practice problems at the end of every chapter use both SI and English units. Solutions are in the companion Solutions Manual. Comprehensive review of thousands of engineering topics, including FE exam topics Over 980 practice problems More than 590 figures Over 400 solved sample problems Hundreds of tables and conversion formulas More than 2,000 equations and formulas A detailed 7,000-item index for quick reference For additional discipline-specific FE study tools, please visit feprep.com. _____ Since 1975, more than 2 million people have entrusted their exam prep to PPI. For more information, visit us at ppi2pass.com.

RNA Turnover in Eukaryotes: Nucleases, Pathways and Analysis of mRNA Decay John Wiley & Sons
In 1971 Marilyn Strathern provided what has now become a classic ethnographic text, Women In Between. Significantly, this pioneering contribution to feminist anthropology focuses on gender relations rather than on women alone. Re-issued now, Women in Between examines the attitudes of the Hagen people and analyzes the power of women in their male-dominated system. Strathern cites case studies of marriage arrangements, divorce, and traditional settlement disputes to illustrate women's status in Hagen society.

The Indonesian Communist Party and Land Reform, 1959-1965 Cengage Learning
This book is about HCI research in an industrial research setting. It is based on the experiences of two researchers at the IBM T. J. Watson Research Center. Over the last two decades, Drs. John and Clare-Marie Karat have conducted HCI research to create innovative usable technology for users across a variety of domains. We begin the book by introducing the reader to the context of industrial research as well as a set of common themes or guidelines to consider in conducting HCI research in practice. Then case study examples of HCI approaches to the design and evaluation of usable solutions for people are presented and discussed in three domain areas: - item Conversational speech technologies, - item Personalization in eCommerce, and - item Security and privacy policy management technologies In each of the case studies, the authors illustrate and discuss examples of HCI approaches to design and evaluation that worked well and those that did not. They discuss what was learned over time about different HCI methods in practice, and changes that were made to the HCI tools used over time. The Karats discuss trade-offs and issues related to time, resources, and money and the value derived from different HCI methods in practice. These decisions are ones that need to be made regularly in the industrial sector. Similarities and differences with the types of decisions made in this regard in academia will be discussed. The authors then use the context of the three case studies in the three research domains to draw insights and conclusions about the themes that were introduced in the beginning of the book. The Karats conclude with their perspective about the future of HCI industrial research. Table of

Contents: Introduction: Themes and Structure of the Book / Case Study 1: Conversational Speech Technologies: Automatic Speech Recognition (ASR) / Case Study 2: Personalization in eCommerce / Case Study 3: Security and Privacy Policy Management Technologies / Insights and Conclusions / The Future of Industrial HCI Research

Population Trends in Indonesia Rowman & Littlefield
This total independence thing really sneaks up on you. One minute you're picking out prom gear, cramming for finals, and screaming for your kid brother to get out of the bathroom. Then it hits you. In a few months, I'll be out of here!

Sociology for Pharmacists: An Introduction is written specifically for professionals and students in pharmacy who are newcomers to the study of sociology. It introduces the key concepts of sociology and demonstrates their importance and application to pharmacy practice in the 21st century. It is unique in its role as the only text to introduce sociology specifically to pharmacists. Rather than an exhaustive treatment, the book provides a concise introduction to major perspectives in sociology-drawing on research evidence pertaining to health, illness, and professional practice-which will inform and enhance pharmacy practice. It offers an

overview of sociology for rather than sociology of pharmacy, and will both inform practitioners and stimulate informed research into the social aspects of pharmacy practice. Key issues covered include: Key sociological concepts and perspectives Contemporary developments in pharmacy practice and pharmacy's professional status A review of research into the way people react to illness and look after their health How and why illness and disease are influenced by gender, ethnicity, and social class Health education and pharmacists' role in promoting health and ensuring appropriate medicine usage Social research methods Pharmacists are frequently encouraged to broaden their day-to-day practice. This timely book does just that by encouraging pharmacists to become more involved with advising clients, managing medicines, and supporting the promotion of health. In addition to providing an overview of these topics, the book also reviews the relevant research, and directs readers to further information.
Sociology for Pharmacists John Wiley & Sons
The purpose of this workshop was to identify performance needs and establish research priorities to address the thermal characteristics of respiratory equipment used by emergency first responders. The workshop provided a forum for representatives from the first responder community, self contained breathing apparatus (SCBA) and component manufacturers, and research and testing experts to discuss issues, technologies, and research associated with SCBA high temperature performance. The goals of the workshop were defined in two parts: 1) Clarify baseline information, including the current state-of-the-art, applicable fire service events, and current related research, and 2) Research planning, including identification of performance needs and short and long term research priorities. Presentations were given to explain the current SCBA and certification process, understand experience from actual fire service incidents, and review the current state of respirator research. After the presentations, the workshop divided into three working group sessions to discuss performance needs and research priorities in smaller groups. Suggested topics for discussion included: a) Current Equipment, b) Current Practice and Usage, c) Future Trends, d) Short Term Research Needs, e) Long Term Research Needs, and f) other issues. The results of the three smaller groups' deliberations were discussed when the full workshop reconvened. The responses from each group were merged into a combination of issues that related to the use and performance of the lens of the SCBA. The primary concerns and research priorities were the characterization of the fire fighter environment, performance of current and new technology, development of

representative and realistic testing, and improvements to fire fighter training on the limitations of protective equipment. A significant amount of discussion concentrated on the testing for NFPA certification, which currently contains limited thermal testing.

The Native Policies of Sir Stamford Raffles in Java and Sumatra Sams Publishing

In the Mount Hagen area of central New Guinea, warfare has been replaced since the arrival of the Europeans by a vigorous development of moka, a competitive ceremonial exchange of wealth objects. The exchanges of pigs, shells and other valuables are interpreted as acting as a bond between groups, and as a means whereby individuals, notably the big-men, can maximize their status. Professor Strathern analyses the ways in which competition between big-men actually takes place, and the effects of this competition on the overall political system.

Engineer-In-Training Reference Manual Equinox Publishing

This useful quick-reference presents all of the key concepts physicians and residents need to know for board certification, re-certification, and general review. Provides a quick synopsis of the most important skin conditions for non-dermatologists. Detailed table of contents and a consistent bulleted format allows instant information retrieval. Coverage includes epidemiology, pathophysiology, clinical features, diagnosis, and treatment.

The Army in Papua-New Guinea Vine Books

The first comprehensive demographic study of Indonesia, this book makes an important contribution to the understanding of the political and economic problems - both past and present - of the world's fourth most populous country. It demonstrates that the period 1970 to 1980 will be particularly crucial for Indonesia and will require careful social and economic planning. The author, who is acknowledged to be Indonesia's foremost economist demographer, amasses and corrects population estimates made during the era of Dutch rule, including material from as early as 1775. He discusses the census of 1930 and the impact of events of the 1940's - World War II, the Japanese occupation, and the Indonesian revolution - on population trends. He points out, for example, that low birth and high mortality rates during the subsequent period, suggest that the mean age of Indonesia's working age population is undergoing a radical rejuvenation. Using the census of 1961 as a base, Mr. Widjojo projects Indonesia's

population to 1991, forecasting the probable growth rates of the total population and of its various components. He shows how the population breaks down into extremely uneven age groups and suggests the serious consequences of this situation. He emphasizes that the dramatic increases in the number of 15-to-24-year-olds that occurred in the population during the second half of the 1960's and that are projected for the 1970's make careful preparation for the future imperative if crises in the labor market and in the field of education are to be dealt with successfully. Population Trends in Indonesia, now brought back to life as a member of Equinox Publishing's Classic Indonesia series, serves as a model for future research and proves invaluable to economic and social planners working throughout the developing world. Widjojo Nitisastro, former Dean of the Faculty of Economics at the University of Indonesia, was Chairman of President Suharto's Economic Team and of the National Development Planning Agency. A graduate of the University of Indonesia, Professor Widjojo received a Ph.D. degree in Economics from the University of California at Berkeley.

The CCNA® Voice certification expands your CCNA-level skill set to prepare for a career in voice networking. This lab manual helps to prepare you for the Introducing Cisco Voice and Unified Communications Administration (ICOMM v8.0) certification exam (640-461). CCNA Voice Lab Manual gives you extensive hands-on practice for developing an in-depth understanding of voice networking principles, tools, skills, configurations, integration challenges, and troubleshooting techniques. Using this manual, you can practice a wide spectrum of tasks involving Cisco Unified Communications Manager, Unity Connection, Unified Communications Manager Express, and Unified Presence. CCNA Voice Lab Manual addresses all exam topics and offers additional guidance for successfully implementing IP voice solutions in small-to-medium-sized businesses. CCNA Voice 640-461 Official Exam

Pigs, Pearlshells, and Women Academic Press
"The articles written for this book show how the religious ideas and ritual actions of the people express their pervasive materialism and rationalize their often tense relations between men and women. The authors show also how the exchange of women in highland societies reflects the political and economic ties between different groups, and how marital preferences and prohibitions influence these relations".--Cover.

Some Tropical South Pacific Island Foods Routledge
Provides road bike enthusiasts with step-by-step guidance to maintaining and repairing their bikes, combining an easy-to-use format and design with high quality photographs of the latest equipment, tools and techniques. Understanding how to maintain a road bike is a necessary skill. This book guides the reader through

every repair possible and give tips on how to spot the early warning signs of trouble so that the problem can be fixed before it leads to costly relacements. The spiral bound design allows the book open flat so the reader can easily follow the fully illustrated step-by-step guidance. It is the perfect reference manual for the workshop or the backpack with lots of tips on how to conduct quick repairs for trouble out on the road.

Ian Hogbin belongs to anthropologys heroic age. He was a member of the brilliant between-the-wars generation that included Raymond Firth, Reo Fortune, Margaret Mead, Gregory Bateson, and Hortense Powdermaker, all of whom pioneered modern field research in the insular South Pacific. The Island of Menstruating Men was a path-breaking exploration of gender in

Wogeo when first published. Today it remains an important full-length study of a Melanesian religion, examining it in relation to other facets of culturemythology, beliefs about illness and death, growth and maturity, magic, social structure, and morality. It is an articulate, insightful examination of the meaning of tradition and of the integration of culture. It is also a captivating account of ethnocentrism and the Wogeos justification for it, exemplifying, in miniature, what appears to be one of the great problems of the human species.

Manufacturing Facilities Design and Material Handling Cisco Press
Practitioners often say: 'We need to do something differently but are not sure what to do or how to do it' and 'Scientists explain complexity but don't tell you what to do in practical terms'. This book has been written to offer solutions for these practitioners - to provide an Approach for 'putting complexity to work'. Practice is, de facto, determined by changing contexts. In a specific instance, what needs doing will depend on the circumstances, and cannot be bounded or decided in advance. But when most auditors, donors or managers demand tangible, target-driven results within a fixed time frame, how can practitioners convince them that working with the open principles of complexity will lead to more successful and sustainable solutions? This book is not 'yet another' complexity book. What it offers is an in-depth, systematic, Framework that practitioners can use to focus on the dynamic phenomena already active in their working context, to be able to shape and influence these phenomena 'on the fly'. The authors present six case studies, including the UK Fuel Crisis (2000) and the 2010 Gulf of Mexico Oil Spill. Their Approach reveals a clear understanding of the stresses and strains that were felt throughout the crises and how these might have been handled differently had an appreciation of the underlying complexity been part of standard practice. Drawn from their own experiences and those of other practitioners, and to bridge the gap between theory, experience and practice, the authors have produced a clear and erudite 'bible' for realising the inherent benefits of 'putting complexity to work'.

Complexity Demystified Carlton, Melbourne U.P
A complete guide to key intelligence and achievement tests and their effective use The tools used in the assessment process have changed dramatically in recent years. School and clinical psychologists need a comprehensive yet focused resource to which they can turn to learn the basics of key intelligence and achievement tests and how to use them in

their assessments of children and adults. With its practical and straightforward presentation, Practitioner's Guide to Assessing Intelligence and Achievement provides that resource. Coedited by two well-known and respected scholars and researchers, Jack Naglieri and Sam Goldstein, the content in this timely book combines traditional and new conceptualizations of intelligence as well as ways to measure achievement. Truly readable and user-friendly, this book provides professionals with a single source from which to examine ability and achievement tests along the same general criteria. Each chapter is written by a leading scholar and test developer and is consistently structured for easy comparison of each test that is examined. Coverage includes: The theory underlying each test Description of each test Tips for administering and scoring each test Standardization, norms, and reliability of each scale Practical guidance for the use of each test Correspondence of each test to IDEA A practical tool designed to aid clinical psychologists in understanding the strengths and weaknesses of the various tests presented, Practitioner's Guide to Assessing Intelligence and Achievement provides students and practitioners with the information they need for their practice and testing efforts to be consistent with recent updates in the field and how those assessment instruments relate to changes in the laws that influence test use.

Home, School, and Community Relations Papua New Guinea Institute of Medical Research This book contains six studies on various national environmental policies and environment -oriented technology policy systems in Austria, Denmark, Germany, the Netherlands, Spain, and the United Kingdom, sandwiched between this introductory and a concluding chapter. These studies were conducted as part of the ENVINNO research project, "Towards an Integration of Environmental and Ecology-Oriented Technology Policy: Stimulus and Response in Environment Related Innovation Networks", which formed part of the Targeted Social and Economic Research (TSER) Programme of Directorate-General XII of the European Commission, now 1 Directorate-General for Research. We like to thank Mrs. Genevieve Zdrojewski of GD Directorate-General Research for her kind support of our research project. The project was carried out between 1998 and 2001 by research teams from the six countries. The co-ordinating institute was the
